About the Webinar

The CORONA pandemic has affected all countries including India. Due to lockdown policies adapted by the various governments, the economic activities have come to a standstill. We assess the immediate challenges that COVID19 has posed to the farm sector and suggest mitigation measures to ensure a sustainable food system in the post-crisis period. Considering the urgent need of sharing the agriculture knowledge among researchers, policy makers, industry and farmers to learn from each other, identify the technologies/practices and develop a roadmap for risk management, the Research and Education Development Society is organizing an International webinar on “Post-COVID-19 Research Advancement in arena of Agricultural, Environmental and Life Sciences during June 15 - 16, 2020. The webinar is jointly organized with Ch. Chhotu Ram (P.G.) College Muzaffarnagar and Unnat Bharat Abhiyan. It aims to bring together the global experience on the advances in agriculture and life science; understanding the impacts of climate change and variability on agriculture; sharing and cataloguing the experiences of agricultural communities on effective interventions and promising technologies for adaptation and mitigation; and identifying areas for future research and collaboration as per the requirements of farming community.
